Development of human, institutional and infrastructural capacities

The capital human is the main premise of development of the research. For this reason, the main effort should be made in order to attract and promote capable persons to generate ideas, to absorb new knowledge and to create.

This it involves:

- Revitalization of career prestige and attract young scientist-researcher in the field of research.
- Prioritization of research activities as a way to increase professional skills and human capital.
- Training of young researchers through doctoral and postdoctoral in the APA.
- Promoting the idea of knowledge-based government, including by strengthening research, innovation and technology transfer aimed at efficiency and competitiveness.
- Ensuring the research process based on excellence, integrated into the international research oriented to satisfy the growing needs of society and the realization of the principles of good governance.

The improving the quality of research processes and studies will include:

- Promoting and implementing the idea of opportunity to learn languages of the international communication: English, French, Russian, etc., for professional careers.

Establishment and management of research priorities:

Management research priorities involves several important issues such as:

- Ensuring communication between Academy laboratories and public authorities.

- Researchers will be trained as experts of programs and personal trainers in the PA domain.
- Promoting doctorate studies in PA, will be aimed to the preparation of specialists, able to solve applied problems arising in the process of public management activities.

Harnessing scientific potential through national and international cooperation activities by:

- Integration the Academy researchers in the national scientific community and European networks of scientists.
- Establishing partnerships with public authorities and international institutions and representative offices in the country and abroad.
- Application to various projects financed by EU funds and other countries, projects of research and training in public administration.
- Developing partnerships with similar institutions from neighboring countries, from the EU and CIS.
- Connecting the research infrastructure of APA to European networks.
- Providing IT support for project evaluation.
- Registration of national research journals in international databases.
